Professional Summary

Self-taught UX/UI and Product Designer, engineer by degree, with 2 years as the **solo designer on 25+ projects** across HealthTech, Wellness, DNA/Genomics, FinTech, EdTech, E-commerce, SaaS and AI products, for both B2B and B2C users. I specialise in **multi-user ecosystems**: I designed GenIx.ai and Billcostro end to end, each serving 9 user roles across web, admin and mobile. With no design team behind me, I own every stage, from research and usability testing to prototypes, design systems and developer handoff.

Experience

UX and UI Designer — Chadura Tech | Bengaluru, Karnataka

Sep 2024 – Present

- Solo designer on **25+ projects** across HealthTech, Wellness, DNA/Genomics, FinTech, EdTech, E-commerce, SaaS and AI, covering B2B platforms, B2C mobile apps, web dashboards and landing pages.
- Designed **2 multi-user ecosystems with 9 user roles each**, mapping role-based workflows and the handoffs between users across web, admin and mobile.
- Took client products from rough concept to shipped UI with no design team, owning research, personas, user flows, wireframes, interactive prototypes, final UI and developer handoff.
- Cut user confusion by **30%** on a multi-step flow by using usability testing and interviews to find drop-off points, then redesigning a cleaner user journey.
- Built and maintain a **design system behind 20+ screens**, and partner weekly with product managers and engineers to balance business goals with technical constraints.

Featured Case Studies

GenIx.ai — DNA & HealthTech Platform (AI) | Multi-user ecosystem · Web, Admin, Mobile · Live

Apr 2025 – Present

- Started with only a raw DNA report and no interface, and designed the complete ecosystem for **9 user roles**; the platform is now live and in use.
- Made genetic lab data **40% easier to understand** by running usability testing and rebuilding the information hierarchy around how real users read results.
- Raised insight clarity by **30%** through personas and opportunity mapping that directly shaped an **AI-driven recommendation feature**.
- Own **50+ mobile and web screens**, validating every release in Figma prototypes with stakeholders before it reaches engineering.

Billcostro — Enterprise SaaS, Cost Management | Multi-user B2B ecosystem · Web & Mobile

Dec 2024 – Mar 2025

- Designed one enterprise product for **9 user roles**, each with its own workflow, keeping the experience consistent across web and mobile.
- Reduced workflow abandonment on high-volume tasks by tracing the root cause to navigation and rebuilding the information architecture from the ground up.
- Cut dashboard interpretation time by **20%** by rebuilding the layout around the metrics users check first.
- Documented a reusable design system and UX standards that let **5+ teams** build consistently without direct design oversight.

Moolago — FinTech & Personal Finance App (AI) | B2C · Android

Mar 2025 – Aug 2025

- Designed a trust-first permission flow to read bank SMS, then turned a single transaction message into a personalised savings plan.
- Raised user clarity on budgeting flows by **30%** and cut time to interpret financial data by **25%**, based on user interviews and redesigned insight modules.
- Designed **AI-supported behavioural nudges** that increased how often users checked their spending, validated through usability testing in Maze.

Skills

Core Skills: UX Research, User Interviews, Surveys, Usability Testing, Personas, User Journey Mapping, Information Architecture, User Flows, Role-based / Multi-user UX, Wireframing, Interactive Prototyping, Interaction Design, Design Systems, Dashboard Design, Responsive Web & Mobile Design, Landing Page Design, Stakeholder Communication, Developer Handoff

Domains: HealthTech, Wellness, DNA/Genomics, FinTech, EdTech, E-commerce, B2B & B2C SaaS, AI Products

Tools: Figma, FigJam, Adobe XD, Illustrator, Miro, Maze, AI-assisted design tools

Education

B.E. ECE (CGPA: 7.99) — Kongunadu College of Engineering and Technology, Trichy

2020 – 2024
